PROFESSIONAL SUMMARY

Detail-oriented Software Developer with a Diploma in Information Technology and a CGPA of 3.74. Proven experience in building full-stack web applications, Data Visualization and desktop management systems using PHP, python Java, C#, and SQL Server. Adept at implementing user authentication, CRUD functionality, and responsive designs to deliver user-centric digital solutions.

PROJECTS

- Automatic Timetable Generation System
- Developed a web-based system to generate clash-free academic timetables by preventing teacher and class scheduling conflicts (PHP, MySQL, JavaScript).
- IT Club Website
- Created a responsive multi-page website for an IT Club featuring homepage, member highlights and a joining form (HTML, CSS, JavaScript).
- DoctorAppointment System
- Full-stack web application for booking appointments with SMTP Email Integration (PHP & MySQL).
- Inventory Management System– Desktop-based system for item tracking and stock updates (Java).
- University Management System – Comprehensive system developed in C# for managing university data, students, and staff (C# & SQL Server).
- Android Notes App – Mobile application for creating, editing and managing notes (Kotlin, Android Studio).
